

TEMPORARY ALARMS

The Secure Site temporary alarm is an instantly deployable system that can be installed and commissioned within a matter of hours. The system available for short and long term hire is packed with features which include up to 64 individual zones which can detect multiple sources including intruder, fire, flood and cold store monitoring.

Why use us?

On alarm activation the system will signal * our central station on its own dedicated mobile network sim for immediate response, where key holders and emergency contacts can be called, additionally the system can contact up to five nominated individuals with a warning text.

Where a vacant property requires a 24hr solution the Secure Site Temporary Alarm offers a really affordable monitoring option that rivals a Security Guard presence at a fraction of the cost, with a host of features which include:

- Instantly Deployable
- Up to 64 individual zones
- Mains or battery powered
- Fully Monitored
- Additional Text alert of up to 5 No's
- Monitors Intruder, Fire, Flood &
- Environmental alarms

For an improved response Secure Site UK have a national team of mobile patrols which can respond to alarm events, investigate the cause and report as necessary or call the emergency services.

* Subject to mobile phone network coverage
