

VOID PROPERTY ALARM

The Secure Site Void Alarm is an instantly deployable temporary alarm system that can be installed and commissioned within a matter of hours.

The Void Alarm system which is available for short and long term hire is packed with features which include, a multi zone control unit which can detect multiple sources including intruder, fire and flood.

On alarm activation the Void Alarm system will signal* our central station on its own dedicated mobile network sim for immediate response, where key holders and emergency contacts can be called, additionally the Void Alarm system can contact up to five nominated individuals with a warning text.

No on site power or telephone connections are required as the Void Alarm system has its own independent GSM mobile coms device and can work in a remote property for up to 12 months, on its internal high capacity battery.

Where a vacant property requires a 24hr solution, the Secure Site Void Alarm offers a really affordable monitoring option that rivals a Security Guard presence at a fraction of the cost, with a host of features which include:

- **Instantly Deployable**
- **Multi Zone Control Unit**
- **Battery powered**
- **Fully Monitored**
- **Text alert of up to 5 No's**
- **Monitors Intruder, Fire & Flood**
- **Available for rental**

For an improved response Secure Site UK have a national team of mobile patrols which can respond to alarm events, investigate the cause and report as necessary or call the emergency services.

* Subject to mobile phone network coverage
