- ✓ No Telephone Line Needed
- ✓ Monitors up to 24 Areas
- ✓ Internal or External Cameras
- ✓ Immediate Response to Triggers
- ✓ Short-Term Rental
- ✓ From 50p an Hour

How Does It Work?

The VideoGuard system uses wireless motion-sensing video cameras to capture live footage of intruders, vandals or thieves, even at night using built-in infra-red illumination. Once triggered, it immediately sends 10-seconds of encrypted video via the GSM network to a central monitoring station, manned by security professional 24/7, to verify the trigger and alert key-holders or the Police.

VideoGuard Camera System Installed

Intruder Activates Cameras

10 Seconds Encrypted Video Recorded & Relayed

True Emergency Response Initiated

Central Monitoring Station Alerted
